

Camco Technologies – AI Trainer

Position

As AI Trainer, you will assist our AI developers in gathering and processing image data. Your job is to ensure that the right data is in the right place, helping to make our AI models smarter.

Your responsibilities:

- Collect and process image data, including downloading images from customers.
- Label and classify images with great attention to detail.
- Create statistics and keep results well-organized.
- Provide feedback to AI developers to improve the model.
- Proactively identify and report errors or inconsistencies.

Profile

- You have a strong IT background, SQL knowledge is a plus.
- You enjoy working in a structured way and don't mind repetitive tasks if it means everything is done perfectly.
- You work independently and take responsibility.
- You are communicative and fluent in Dutch and English.
- You enjoy organizing and structuring data.

Offer

- A **permanent position** with a competitive salary package.
- An open, informal, and dynamic work environment.
- A key role within our **R&D AI team**.
- A varied job where you can truly make an impact.
