

# Camco Technologies – Operator Truck-Mounted Boom Lift/Technician From road to vessel

## Your role

We are looking for a skilled and hands-on operator for a truck-mounted boom lift, to support on-site installation, maintenance, and operational activities. The role requires a hands-on individual who is comfortable working at height and operating manlifts up to 70 meters.

### Key Responsibilities

- Perform hands-on technical and mechanical work on-site
- Operate and maintain manlifts and access equipment up to 70 m safely and efficiently
- Carry out installation, inspection, repair, and maintenance tasks at height
- Transport equipment and materials using company vehicles
- Follow all site safety regulations, risk assessments, and work procedures
- Coordinate with site supervisors and project teams to ensure smooth execution of tasks
- Conduct basic checks and maintenance of Camco installations
- Work at heights of up to 70 meters
- Outdoor work in varying weather conditions
- Regular travel to project sites all over Europe for longer periods.

## Your profile

- Valid Driving Licence Category C (mandatory)
- Valid BeSaCC-VCA certification for IS-004 (Hoogwerker op vrachtwagen) (mandatory)
- Valid VCA
- Proven Experience operating manlifts
- Proven hands-on technical experience (mechanical or industrial background preferred)
- No fear of heights and medically fit to work at elevated positions
- Strong awareness of health & safety requirements
- Ability to work independently and as part of a team

- Flexible, reliable, and solution-oriented mindset

## **Our offer**

- You will work in a high-tech and challenging environment, and you will have opportunities to further develop your skills.
- You will work within a supportive team culture focused on collaboration and excellence.
- You will receive a permanent contract with competitive salary package.
